

Greet CE

Green transition in
Central Europe

Greet CE

Fortifying interregional cooperation and investments in shared smart specialization areas.

Supporting innovation ecosystems and growth of SMEs in less developed Central EU regions.

Facilitating the green transition in bioeconomy, construction and energy sectors.

DURATION:

- 24 months (Nov. 20th 2023 – Nov. 19th 2025)

BUDGET:

- 1,398 million EUR

PROJECT COORDINATOR (LP):

- KSSENA

PROGRAMME:

- Interregional Innovation Investment (I3) Instrument

CALL:

- Capacity building – Strand 2b

MANAGING AUTHORITY:

- EISMEA

PROJECT PILOTS

Opportunities in priority domains and niches

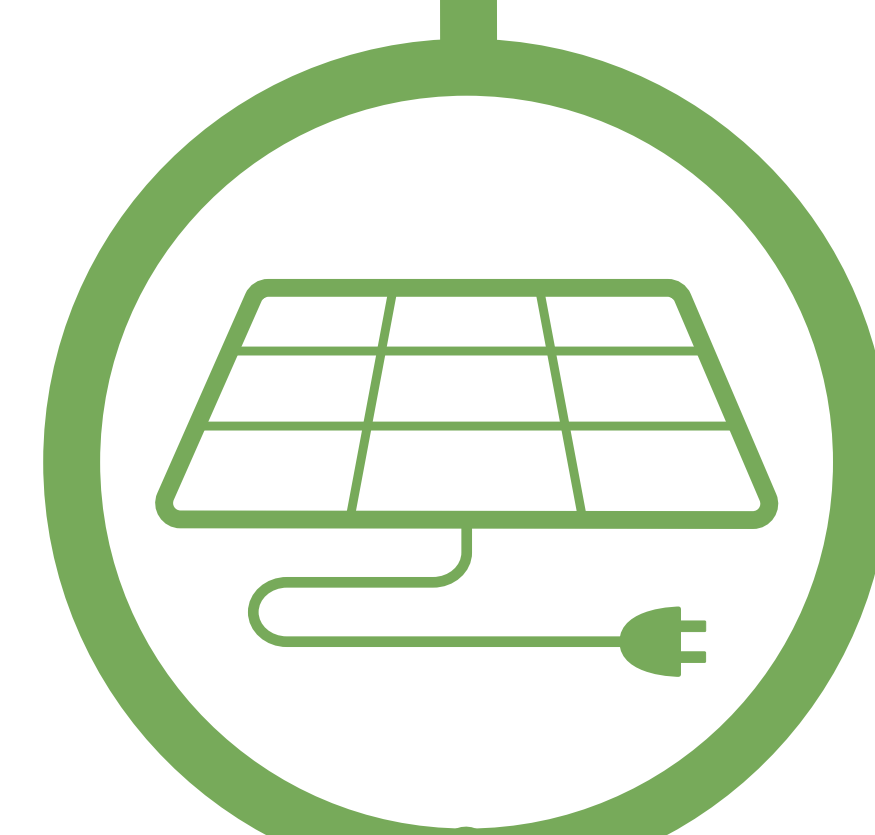

Renewable gases as alternative energy vectors and feedstock for circular industrial processes.

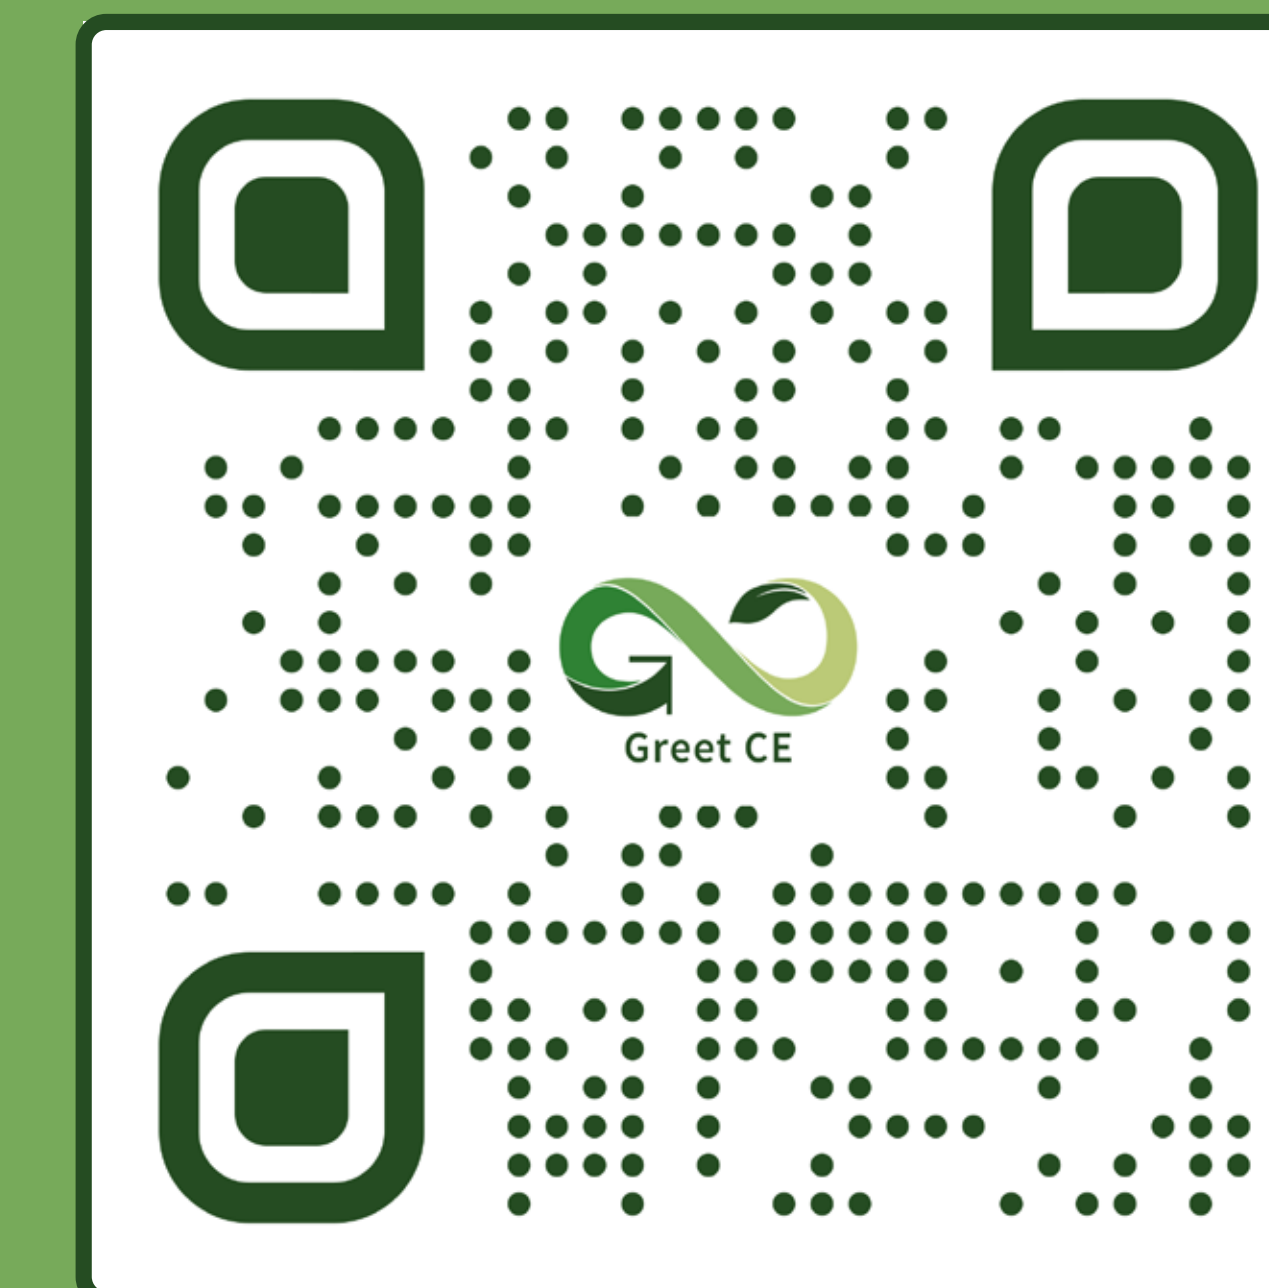

Sustainable materials and innovative products for energy renovation that reduce resource usage and GHG emissions.

Circular and regenerative food systems that restore soil, protect water resources and promote biodiversity.

Advanced monitoring and control for matching supply and demand, supporting a decentralised RES-based energy system.

Funded by
the European Union

PRIMARY OBJECTIVES

1

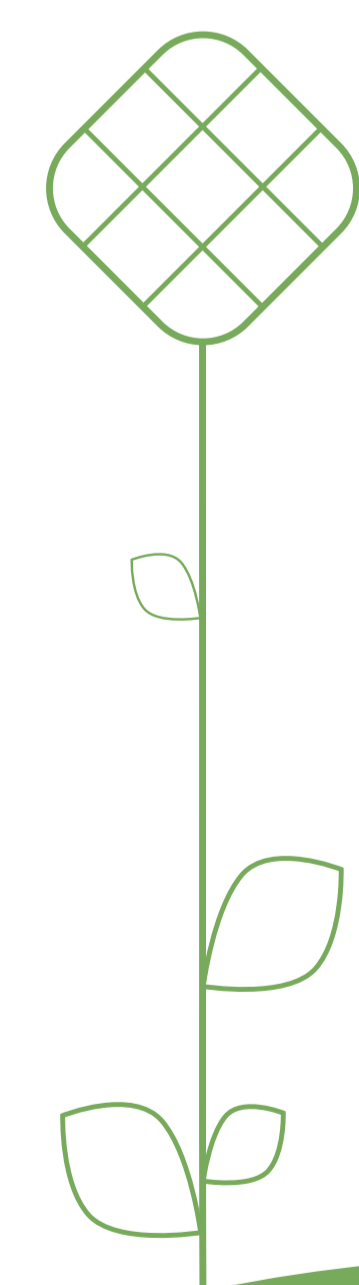

Increase the capacity of regional innovation ecosystems, especially SMEs in less developed Central European regions to connect and interoperate in EU value chains, participate in partnerships with other regions.

2

Unlock the innovation potential, facilitating the subsequent participation of SMEs in calls for proposals under I3 Strand 1 and Strand 2a. The project will also assist in creating other ERDF, Interreg and crowdfunding opportunities.

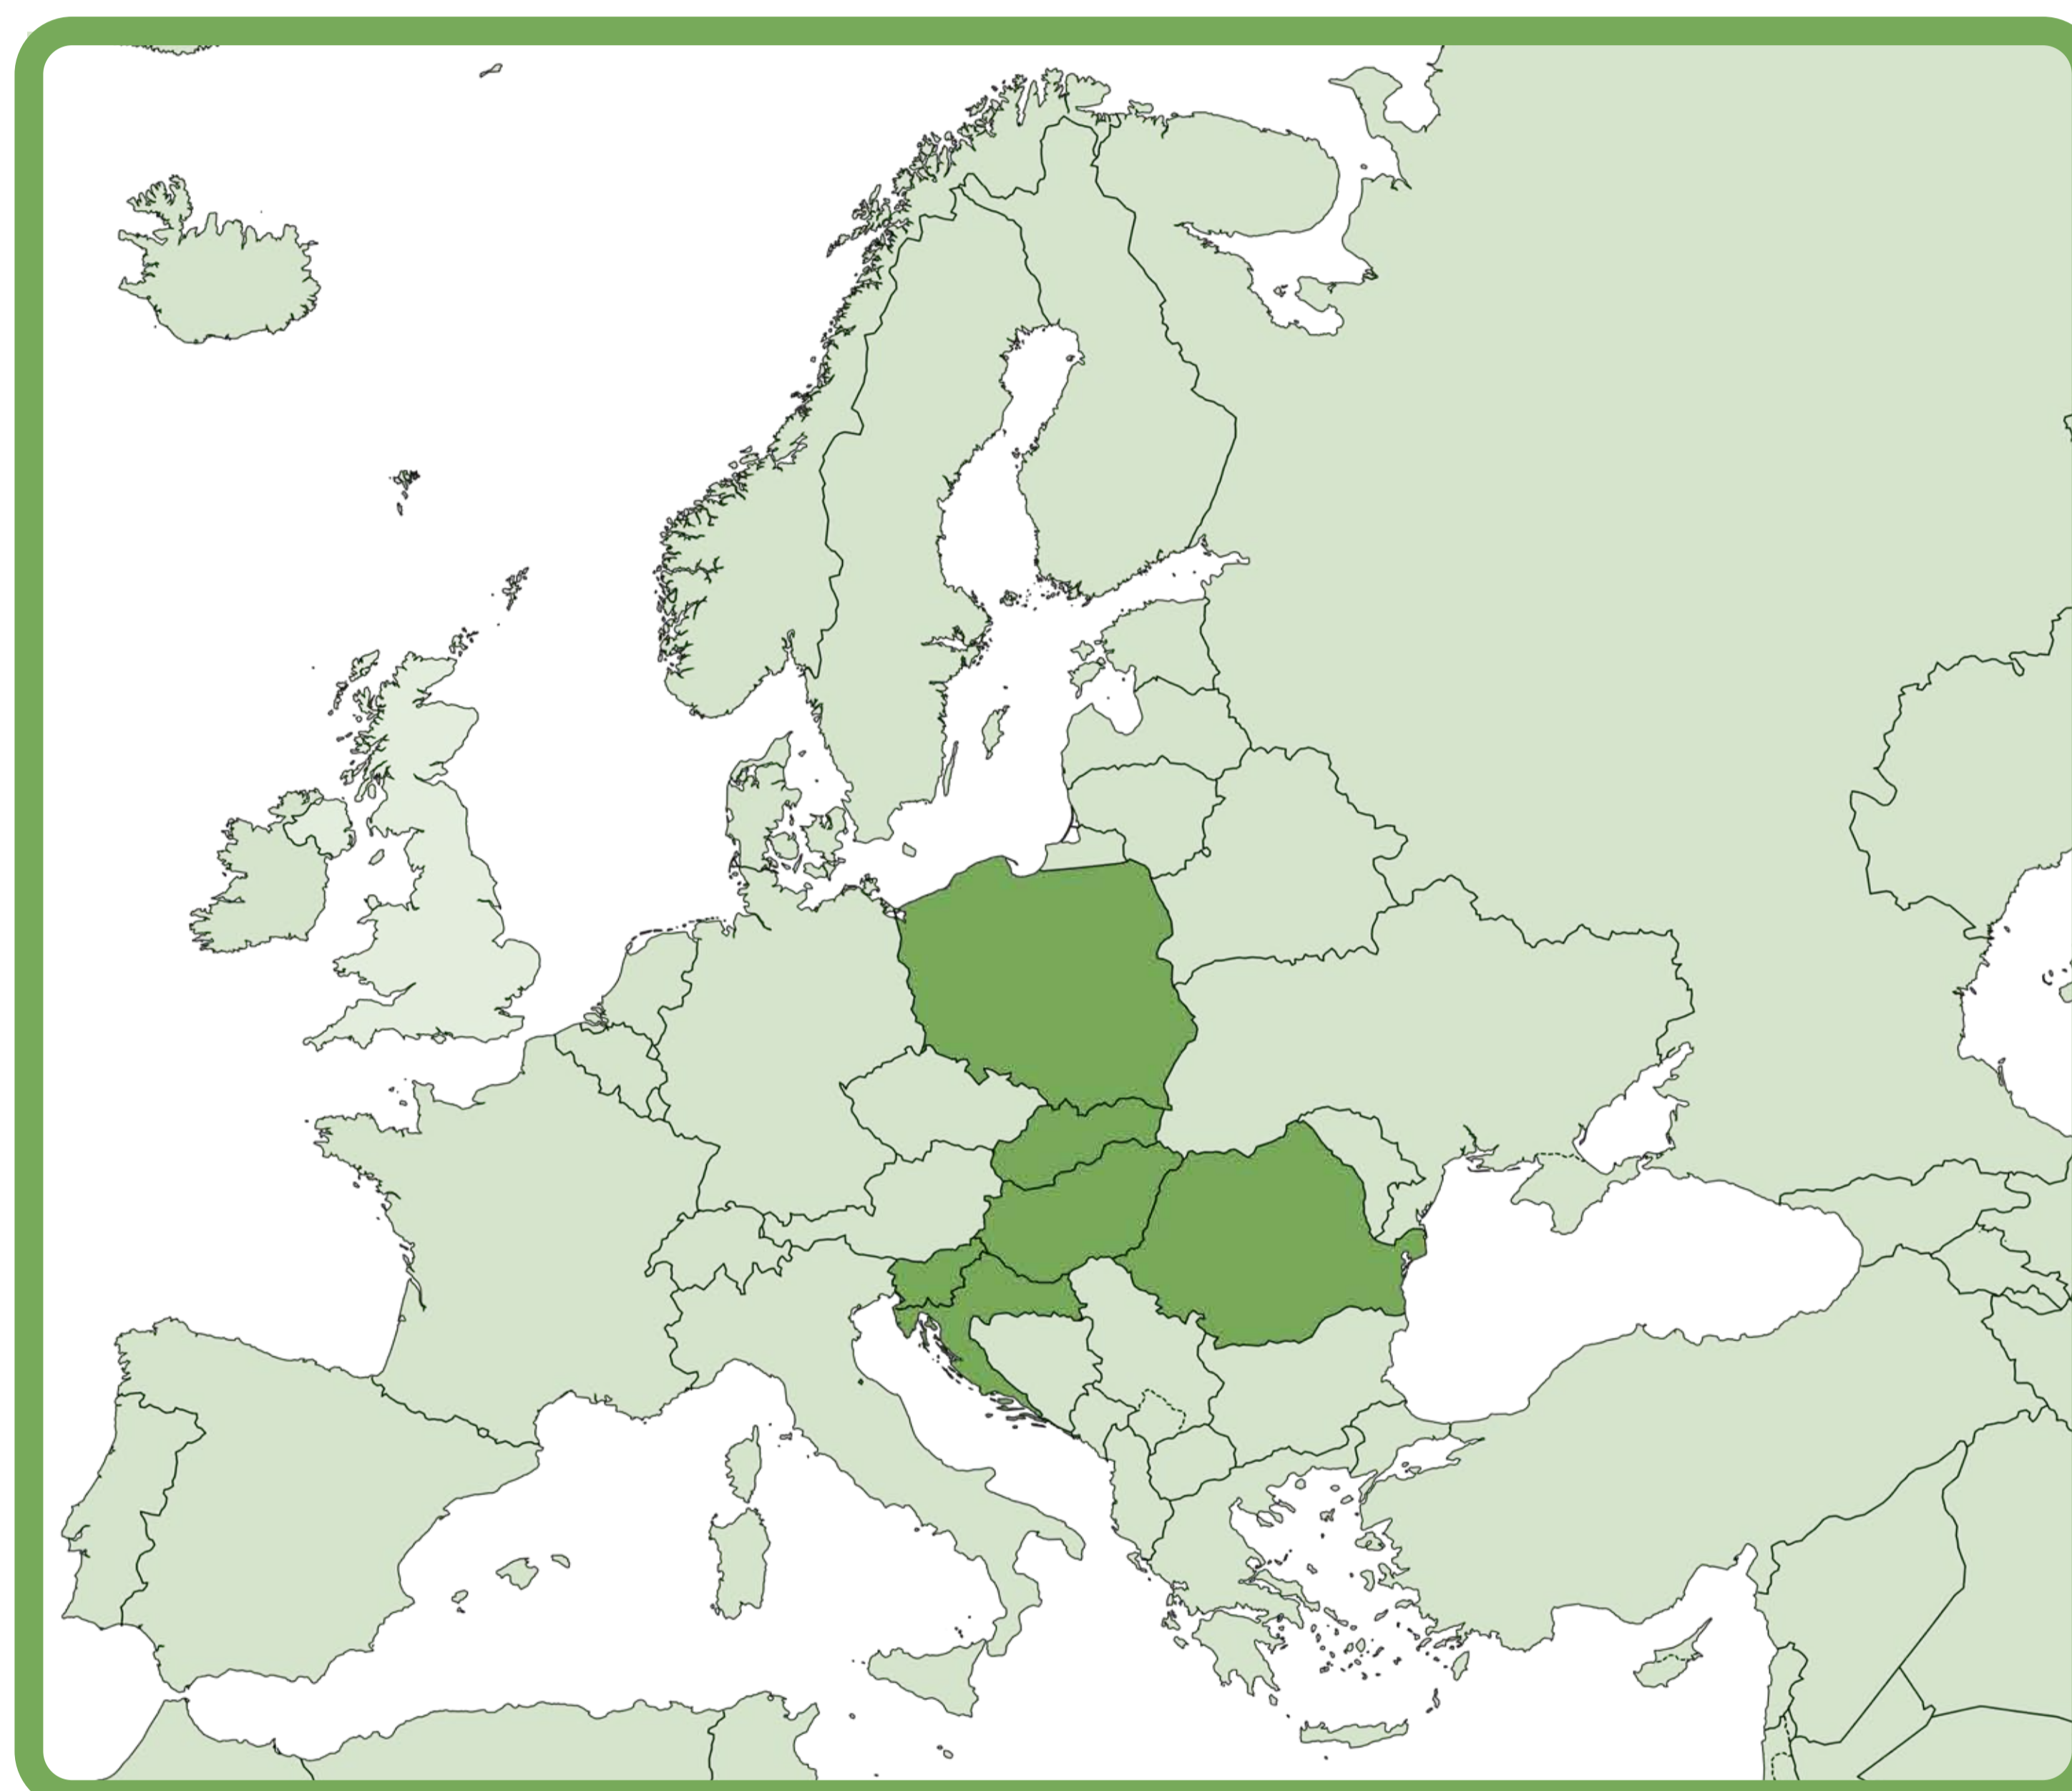

3

Create the preconditions for successful interregional cooperation and investments in shared smart specialization areas, especially in Green Transition having a specific focus on the energy and bioeconomy sector.

PROJECT CONSORTIUM

Partners from 7 regions of 6 Central European countries (including 4 less developed regions)

MAIN THEMATIC ACTIVITIES

WP 1

- Project Management

WP 2

- Research and analysis
- Stakeholder engagement
- Benchmarking of regional ecosystems
- Value chain analysis
- Analysis of resources and opportunities

WP 3

- Value chain and policy development
- Innovation ecosystem development
- Policy development
- Pilot actions
- Communication and dissemination

WP 4

- Value chain and policy development
- Identification & screening of investment projects
- Capacity development of project owners
- Investment project marketing
