Type of support:	Eligible costs:	Indicative amount of funding:	Period of eligibility:
grants	the cost of external contractors for the actual execution of the GOI works, the cost of the GOI works comprising the cost of construction, purchase and installation of equipment, information and communication costs	EUR 2,5 million	From the date of application until 30.6.2027
Beneficiaries:	Contractor:	Amount of co-financing:	Application deadline:
Narrower or broader public sector, of which the RS, a municipality or a public housing fund is the founder	MOPE	up to EUR 306,00 per m <sup>2</sup>	18.11.2024

# Call for proposals for the co-financing of upgrading of technical building systems (NOO\_TSS\_2022)

**Purpose:** co-financing is provided for projects for the construction of new or the modernisation of existing central ventilation systems with heat recovery and/or air-conditioning systems (hereinafter referred to as 'the measure') in buildings that have already undergone energy renovation but require appropriate upgrading of the individual technical building systems.

Type of support:	Eligible costs:	Indicative amount of funding:	Period of eligibility:
grants	External contractors for GOI works, GOI works	EUR 13 million	from the date of application until 31.8.2025, and for investment and project documentation costs from 1.1.2021
Beneficiaries:	Contractor:	Amount of co-financing:	Application deadline:
Buildings for educational programmes owned by municipalities or the RS, buildings for higher education or university education owned by the RS, and buildings for residential and long-term care for the elderly	MOPE	up to EUR 277,00 per m <sup>2</sup>	13.01.2025

# Call for proposals for grants for pilot projects for co-investments in the comprehensive energy renovation of older multi-apartment buildings, co-funded by energy service companies (LIFE IP-2024-1)

The subject of the call for tenders are non-repayable financial incentives to the owners of the buildings for joint investments in the complete renovation of older multi-apartment buildings, co-financed by an energy service company which will provide energy efficiency services and will be selected by the owners on the market of energy efficiency service providers.

Type of support:	Eligible costs:	Indicative amount of funding:	Period of eligibility:
grants	Varies and depends on the energy measure	EUR 0,5 million	not specified
Beneficiaries:	Contractor:	Amount of co-financing:	Application deadline:
Floor (co-)owners (9) Natural persons, legal persons, sole traders, legal persons governed by public law	MOPE	between 50 % and 100 % - depending on the measures, the structural rehabilitation, the location and the status of the applicant	25.10.2024, 29.11.2024

# SPP Productive Investments - Call for proposals to promote investments for economic restructuring in the Zasavska and Savinja-Silesia coal regions under the Fair Transition Fund 2024-2027

**Purpose:** economic restructuring of the two coal regions by promoting new jobs and diversified, sustainable investments that will contribute to mitigating the consequences of coal phase-out. Duration of projects: maximum 36 months, to be completed by 30 June 2027 at the latest. The minimum threshold for the operation (sum of eligible costs excluding VAT) is EUR 500 000, of which 50 % for machinery and equipment.

Type of support:	Eligible costs:	Indicative amount of funding:	Period of eligibility:
grants	construction costs; purchase/lease costs of tangible fixed assets; purchase costs of intangible fixed assets; transport, installation and commissioning costs of machinery and equipment	EUR 68.7 million Zasavje: 15,72 million (V) 10,48 Mio (MSP) SAŠA: 12,75 Mio (V) 29,75 Mio (MSP)	From the date of application until 30.6.2027
Beneficiaries:	Contractor:	Amount of co-financing:	Application deadline:
micro and small enterprises, medium-sized enterprises, large enterprises of the RS; enterprises from EU Member States (head office or branch established in the SLO by the first payment of the	SPIRIT (MGTŠ)	micro and small p. 50 % medium p. 40 % large p. 30% (possible increase of up to 10 percentage points)	1. 7. 2024 2. 12. 2024

# JR INVEST2024-NOO - Call for proposals to promote large investments for higher productivity and competitiveness in the RS 2024

**Purpose:** to encourage companies to make sustainable investments by investing in more advanced technology and business process automation that will contribute to decarbonisation, the green and digital transition and, in the long term, lead to higher corporate productivity, recovery, resilience, growth and economic competitiveness.

**Objective:** to increase productivity and competitiveness; to add more value to products and services, preserve jobs; to strengthen value chains; to spread investment more evenly across the region.

Type of support:	Eligible costs:	Indicative amount of funding:	Period of eligibility:
grants	investments in tangible and intangible fixed assets	EUR 9,8 million	From the start of implementation of the inv. until 30.6.2026 at the latest
Beneficiaries:	Contractor:	Amount of co-financing:	Application deadline:
SMEs and large companies (company registered at least 12 months before the application is submitted)	SPIRIT	Depends on the size of the company and the location and state aid scheme. Up to a maximum of EUR 819 279,50	11. 9. 2024

# Investing in URE and decarbonisation in industry (REPowerEU)

**Purpose:** to promote investment in energy efficiency and decarbonisation measures in industry that will contribute to reducing dependence on fossil fuels and to accelerating the green transition by improving energy efficiency, decarbonisation and increasing the use of renewable energy sources.

**Objective:** to support projects of companies focusing on energy efficiency in industry, including investments in energy efficiency in industrial buildings, decarbonisation or reduction of GHG emissions from industrial activities through diversification of energy sources and investments in electricity and/or heat energy storage.

# ANNOUNCED CALLS FOR TENDERS ECP 2021-2027

JAVNI RAZPISI

# European Cohesion Policy measures 2021-2027

## 1. Construction and rehabilitation of road infrastructure

- **Developing smart and sustainable transport networks:** the construction and modernisation of road infrastructure, in particular at local, regional and cross-border level, will include investment in the Trans-European Transport Network (TEN-T). These networks will be key to better connectivity within regions and with neighbouring countries. In addition to improving transport links, the focus will also be on reducing transport emissions, which means using sustainable building materials and technologies.
- **Measures to make infrastructure more resilient to climate change:** resilience to natural disasters such as floods, landslides and earthquakes will also be a focus of construction projects. Construction projects will need to take into account new climate risks and introduce resilient building solutions.

## 2. Construction and modernisation of water and sanitation networks

- **Improving access to water:** the focus will be on the construction and rehabilitation of water supply networks, including in particular reducing water losses and improving water quality in regions where access to drinking water is currently limited. Construction projects will include both the rehabilitation of existing systems and the construction of new, sustainable networks.
- **Upgrading of municipal infrastructure:** as part of measures for sustainable use of resources, the construction sector will be involved in projects to upgrade municipal systems (e.g. sewers, wastewater treatment plants), with the aim of reducing pollution and optimising water consumption.

# European Cohesion Policy measures 2021-2027

## 3. Energy renovation of buildings and infrastructure

- **Energy renovation of public and private buildings:** projects will be supported for the comprehensive energy renovation of buildings to increase energy efficiency, reduce energy consumption and CO2 emissions. This includes the use of advanced building materials and technologies such as smart energy monitoring systems.
- **Measures to improve energy efficiency in residential buildings:** construction projects will be supported by grants to encourage owners and businesses to implement energy efficiency measures such as insulation, replacement windows, installation of solar panels, thereby contributing to reducing energy consumption.

## 4. Green infrastructure and nature protection

- **Construction of green infrastructure:** This includes projects aimed at developing green spaces, parks, urban areas with reduced traffic congestion and the integration of natural elements in urban areas. Construction projects will focus on improving the quality of life and reducing the impact of urbanisation on the natural environment.
- **Flood protection and construction measures to prevent natural disasters:** flood protection structures such as embankments, water retention basins and protection channels will be built.

# European Cohesion Policy measures 2021-2027

## 5. Sustainable mobility

- **Building and renewing the public transport network:** the focus is on improving sustainable urban mobility, including the construction of public passenger transport infrastructure such as new bus lines, tram lines and rail links. The aim is to reduce car traffic and thus emissions.
